ABSTRACT

Listed are 269 solid waste management publications available from the U. S. Environmental Protection Agency (EPA). There are EPA publications reporting on results of the research, development, and demonstrations in progress as authorized by the Solid Waste Disposal Act of 1965. Certain conference proceedings, findings of various commissions and study groups, and other collateral literature are also available. A group of publications on solid waste management that are available only from the Department of Commerce National Technical Information Service (NTIS) are also included in this list. The publications are arranged in the categories which the EPA has found useful in answering inquiries. (JP)

Foreword

The importance of collecting and making available the information pertaining to solid-waste-related research, demonstration projects, and other activities was emphasized by the specific authorization contained in Section 204(b) of the Solid Waste Disposal Act, Public Law 89-272. The present booklet lists publications that have been collected or published by the U.S. Environmental Protection Agency in response to this directive.

for Solid Waste Management

Introduction

The solid waste management publications available from the U.S. Environmental Protection Agency (EPA) are from various sources. There are EPA publications reporting on results of the research, development, and demonstrations in progress as authorized by the Solid Waste Disposal Act of 1965. This far-reaching Federal grants and contracts program has generated solid-waste-related research in many fields. The reports from the grantees and contractors are being published by EPA as soon as available. Results of intramural research and technical investigations conducted by EPA staff are printed by EPA or submitted to professional journals so that the reports will reach the largest possible audience. In the latter case, reprints are frequently purchased and distributed by EPA. Certain conference proceedings, findings of various commissions and study groups, and other collateral literature are also available.

The publications are arranged in the categories which we have found useful in answering inquiries; publications may appear in more than one category. For convenience in ordering and to expedite distribution, each publication has been assigned a permanent number.

In addition to the list of roughly 260 publications that may be ordered from our Solid Waste Publications Distribution Unit, we are now listing a group of publications on solid waste management that are available only from the Department of Commerce National Technical

Information Service (NTIS). Certain of our reports on grant and contract activities have been published through NTIS because of the need to make this technical data available to a larger technical audience as speedily as possible. The reader must request these directly from NTIS, as indicated on page 43.

In gathering together and publishing this body of information on solid waste management, EPA hopes to assist those engaged in the task of finding ways to manage the Nation's burden of solid wastes. The Agency hopes, too, that by indicating the breadth of the solid waste management field, additional people may be attracted into the field--as investigators, as engineers, as managers--wherever their talent fits. And, most important, we hope that the American citizen will see in the publications available here, evidence of progress made and of the need for continued effort in response to the solid-waste-related legislation enacted by the Congress.
